<i>Handwashing visible before and after visit (if possible).</i>											
1) I introduce myself and role (and my team) at patient/family bedside.											
2) I sit (preferred) at eye level to discuss patient/family plan of care. (Patient/family-driven plan rather than provider imposed)											
3) I ask about/discuss patient/family's immediate goals, needs, priorities.(Immediate includes this episode of care.)											
4) I discuss patient/family's longer term outcomes/priorities/plan (including life and ADL impact).											
5) I make as clear as possible our shared intended plan of care to the patient/family with empathic listening.											
6) I ask "What other questions do you have?" while I remain at eye level, proximate to patient/family.											
7) I make clear (written and/or verbal) our shared intended plan of care to the RNs and/or other team members.											
8) I feel satisfied with the care I am able to provide with this patient/family (Rate from 0-100%).											
9) I offer feedback to other team members related to our teamwork and this patient's care.											
10) Comments
